Now shipping pilots

Raven for Enterprise

Hands-free, on-device computing for teams that can't stop to look at a screen.

Let's talk.

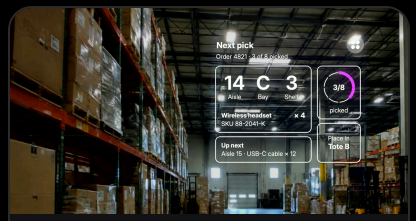
Tell us about your team and how you work. We'll tailor the deployment to your needs and help you launch your pilot.

hello@raven.computer

raven.computer/enterprise

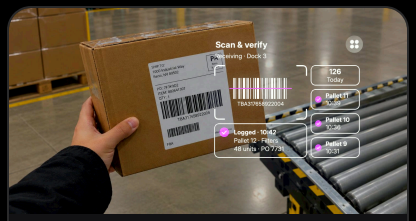
MADE IN USA

Eyes up. Hands free. Private by design.

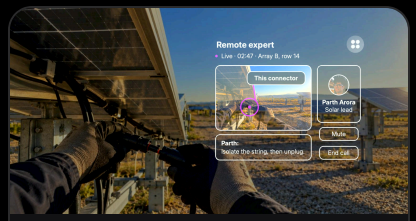


Beautiful color display in view. Important info on the go.

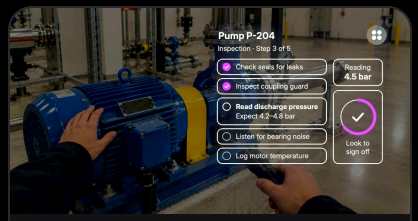
Eyes as input. Both hands stay on the job.



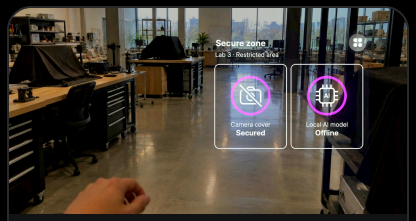
Built-in cameras and mics. Log your items as you go.



Ambient computer. A full computer in glasses with a camera, display, Wi-Fi and a lot more.



Built for your periphery. Your view of the work stays clear.



Secure by design. On-device compute and a physical camera cover.

Built for the full shift.

PRIVACY

Runs on the device

Apps and models run on-device, with the cloud only when you need it.

PRIVACY

Physical camera cover

No software can open the camera cover. Built for no-recording zones.

EYE CONTROL

Truly hands-free

Gaze replaces the clipboard and the handheld. No learning curve.

POWER

Hot-swappable Raven Wings™

Swap batteries in seconds, with zero downtime, all shift.

PLATFORM

Open Linux on ARM64

Port existing apps with no rewrites and no lock-in.

PLATFORM

Python SDK + UI kit

Internal teams ship polished eye-control apps fast.

COMFORT

Made for all-day wear

Lightweight and balanced, comfortable for the full shift.

PRIVACY

Pull the batteries, it's off

A power-off you can verify between secure and non-secure areas.
